AN EFFICIENT SUPPLY SOLUTION

Aggregate Industries volumetric trucks offer a new delivery option for the supply of concrete to various sized construction projects. This on-site concrete solution provides an efficient and cost-effective method that reduces waste.

- ▶ **Flexibility:** concrete can be mixed in small or large quantities as and when required. Deliveries are available from 1m³
- ▶ **Environmentally friendly:** reducing waste and lower emissions in transportation
- ▶ **BSI Assured mix-on-site trucks**

ON-SITE BATCHING FACILITIES FOR LARGER PROJECTS (>2000 M3)

Aggregate industries can set-up a batching facility to base the volumetric trucks on your construction site.

- ▶ **Reduced transport costs:** with mixing equipment based on-site, minimal vehicle movement is required
- ▶ **Improved site efficiencies:** concrete available on-site continuously throughout the working day

OUT OF HOURS – 24/7 DELIVERY WHEN YOU NEED IT MOST

We are able to offer a full out-of-hours service supported by a dedicated night team for your project. Customers can be confident that, as well as being assigned ample coverage, this service offers the same quality systems as the regular daytime operations.

EFFICIENCY

Dedicated Aggregate Industries technical sales staff are on hand to manage your project from initial enquiry through to completion, quickly and efficiently.

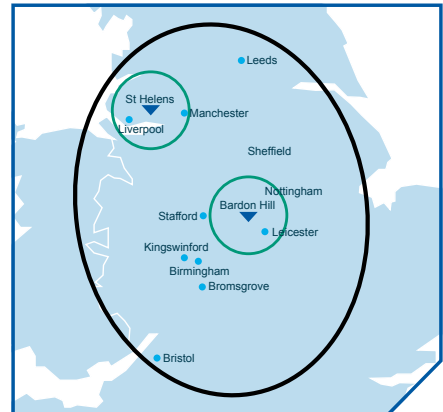

SPEED

Strategically located sites ensure delivery to UK locations.

COST

Designed to save you both time and money so you only pay for the amount of concrete you use.
